PROFESSIONAL PROFILE

Frontend Developer specializing in building responsive and scalable web applications using React, TypeScript, and modern JavaScript. Experienced in building data-driven interfaces, integrating REST APIs, and developing reusable component systems. Passionate about transforming complex data into intuitive user experiences while ensuring performance, accessibility, and maintainable code.

TECHNICAL SKILLS

Languages & Frameworks: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Web Application Development: REST API Integration, Client-Side Routing, CRUD Operations, Form Validation, Authentication

Architecture & Performance: Component-Driven Development, Reusable Component Systems, Data-Driven Interfaces, Performance Optimization, Responsive Design

Tools & Workflow: Git, GitHub, Agile, Jira, Trello, Notion

PROFESSIONAL EXPERIENCE

Frontend Developer — Deasytech Solutions

June 2025 – Present

- Delivered 6+ frontend projects from design brief to production.
- Responsible for MVP development of all websites and applications.
- Consume API endpoints from backend engineers into the frontend of all projects.

EDUCATION

AltSchool Africa — Diploma, Frontend Engineering

Oct 2024 – Nov 2025

University of Benin — B.Sc. Chemistry

Dec 2019 – Feb 2024

SELECTED PROJECTS

TaskFlow — Full-Stack Project Management Platform

TaskFlow is a full-stack project management platform built for distributed teams. It combines real-time collaboration, flexible task tracking, and a clean interface to help teams ship faster and stay aligned.

<https://task-flow-4j2lqdh8-circle2-eacf58b9.vercel.app>

FlowSync — Workflow Management Dashboard

FlowSync gives engineering and product teams a central hub to manage their workflows, automate repetitive processes, and track delivery metrics through a clean, data-forward dashboard.

<https://flow-sync-i2nfpieyz-circle2-eacf58b9.vercel.app>

Revolvemoney — Password Recovery System

- Developed a secure password recovery workflow using React with dynamic form validation and error handling.
- Integrated API endpoints to support authentication and password reset operations.
- Built reusable UI components to maintain consistent state across loading, success, and error flows.

Chatbuddy — Messaging Application

- Built modular React components for a scalable messaging interface.
- Implemented asynchronous data fetching and loading states for dynamic data rendering.
- Designed responsive UI layouts using modern CSS and component-driven architecture.
